

2021/2022 Contest Theme "The Future of Flight"

Over 100 years ago, in 1903, two American brothers named Orville and Wilbur Wright made history when they invented, built and flew the world's first successful motor operated airplane.

Since then "flying" has become a way of life and aircrafts have evolved to getting bigger and faster and flying farther and farther away from earth.

For this year's contest we are asking all young innovators to think about "the future of flight".

- **What will we be flying in?**
- **Where will we be flying to?**
- **How will flight work?**

We know that all of our young innovators across the San Antonio Area will take this mission to heart and create beautiful depictions of what they believe to be the "future of flight".

Educators!

This is a great way to get your students involved in STEAM. If you would like your students to participate in the 2021-2022 Art Contest please register at [this link](#)

The first 40 Educators to register receive a \$100 classroom stipend paid to your district foundation/campus.
